

Pavement Sign Holder

This A1 pavement or forecourt sign is perfect for outdoor or indoor use. Its heavy duty curved plastic base has a filler cap through which you add water to act as ballast. Two springs connect to base to the frame so that excess wind force can be dissipated. A1 silver snap frame provides double sided display of your pavement advertising. Posters (not supplied) can be changed easily by opening up the frame border - no tools required. The attractively curved base has wheels and also incorporates a handle to make moving it simple and easy to be wheeled in at night

Effective ways of communicating brand messaging

- Integrated wheels allowing the sign holder to be easily wheeled in at night.
- Heavy base plus springs giving the stand stability in strong winds
- Sign Holders represent great value to business owners, who are looking for the most effective way to communicate and advertise to potential customers.
